Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# Segundo-Parcial" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/DA0C921/Segundo-Parcial.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/DA0C921/Segundo-Parcial.git
git branch -M main
git push -u origin main
```

...or import code from another repository
